DESCRIPTION
Exit is the story of a student, who like many, gives up everything after an overwelming incident and decides to start over in the country. However, when we have a broken spirit we carry it with us wherever we go. The magic door of space and time is only an illusion. To each their own. If we are our own source of defeat, there may not be a solution. This video, along with special effects, is a reflection on death and suicide.
