**DESCRIPTION**

*La nature contre-attaque* is a video essay that depicts a hellish scenario in which animals revolt in reaction to the environmental damage caused by humankind.

Through a re-editing of film archives and a voice-over commentary, the film addresses the issue of the treatment of animals in cinema, looks at the origins of the current environmental crisis and attempts a chronological analysis of the evolution of the 'nature's revenge' sub-genre over the course of its golden age.
