Documentary

SERIE

Initiation à la psychologie

DESCRIPTION

This series gives the opportunity to get an overview of contemporary psychology. These 13 one-hour programs each deal with one particular aspect of psychology and together they give an accurate portrait of different techniques, theories and applications of this discipline. Produced in Quebec, this series gives the chance to meet many researchers in the province and discover their subjects and the social preoccupations of our own culture.

Episode #12 - *Les autres* : the others, the outcasts, the "sick", they may be mentally deficient, disabled or delinquent persons. They help us reconsider the notion of normality, the value of affectivity, our tolerance to difference.
