French

**CATEGORY**

Experimental

Fiction

Image not found or type unknown

**DESCRIPTION**

My aunt is 60 years old. She is about to undergo a series of injections of cells taken from a heterocephalus -- an animal of great longevity that is immune to all cancers. Speaking to the camera, she describes a very peculiar ritual intended to preserve her body, and potentially induce a change.

*Rodentia* examines the fears and fantasies of the timeworn female body steered by the beauty industry and scientific promises.

**SOUND**

Stereo
